Install Download a reel Settings Help

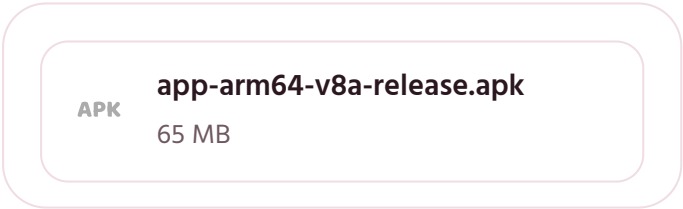

PART 1 · ONE TIME ONLY

Install the app

Pretty Saver isn't on the Play Store, so you install it from the file you were sent. It takes about a minute. Works on Android phones only.

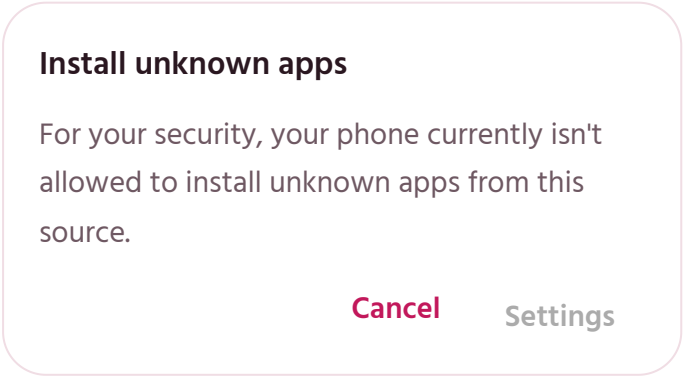

1 **Open the file you received**

Tap the APK file in WhatsApp, Telegram or your **Files** app (look in **Downloads**).

2 **Allow installing from this app**

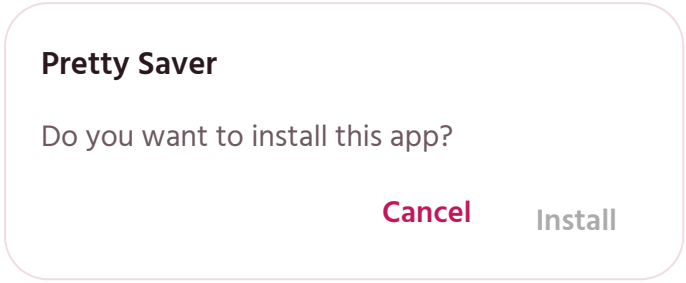

The first time, your phone asks for permission. Tap **Settings**, turn on **Allow from this source**, then go back.

3 Tap Install

If Google Play Protect shows a warning, tap **More details** and then **Install anyway**. It warns about every app that isn't from the Play Store.

4 Open Pretty Saver

Find the pink **P** icon on your home screen. The very first start takes a few seconds while the app gets ready.

The exact words on these screens differ a little between phone brands, but the steps are the same.

PART 2 · EVERY TIME

Download a reel

Only reels from public accounts can be downloaded.

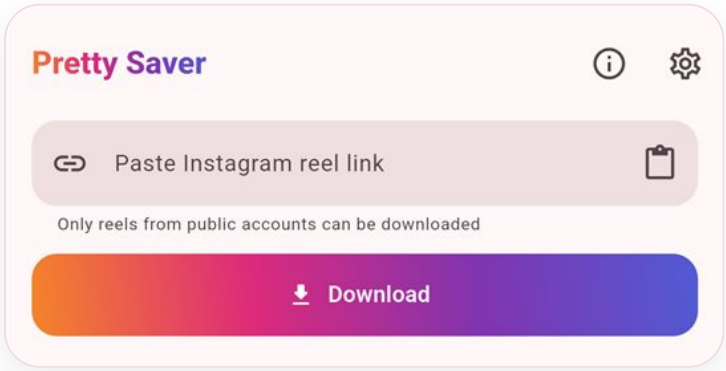

A public account has no 🔒 lock next to its name. Reels from private accounts won't download.

1 In Instagram, open the reel

Tap the **Share** button (the paper plane), then tap **Copy link**.

2 Open Pretty Saver and tap Download

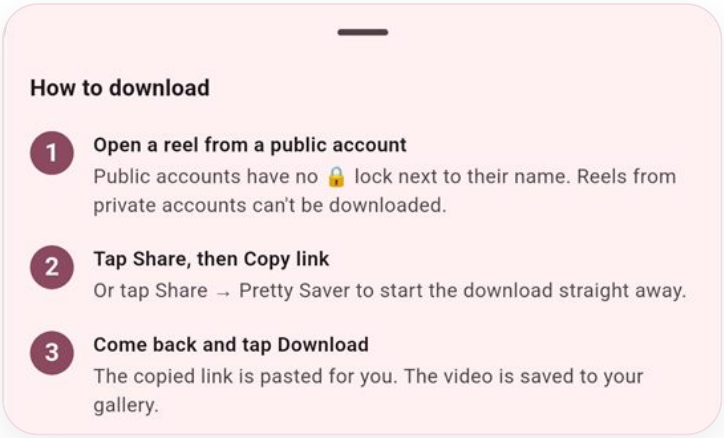

The link you copied is pasted in the box for you. If it isn't, tap the paste icon on the right of the box.

3 **Wait for "Saved"**

A progress bar shows the download. When it's done, the video is in your **Gallery** (folder **Download/PrettySaver**) and in the list in the app.

Shortcut: in Instagram, tap Share → **Pretty Saver** (under "More" if you don't see it). The download starts by itself.

Forgot the steps? Tap the ⓘ icon at the top of the app.

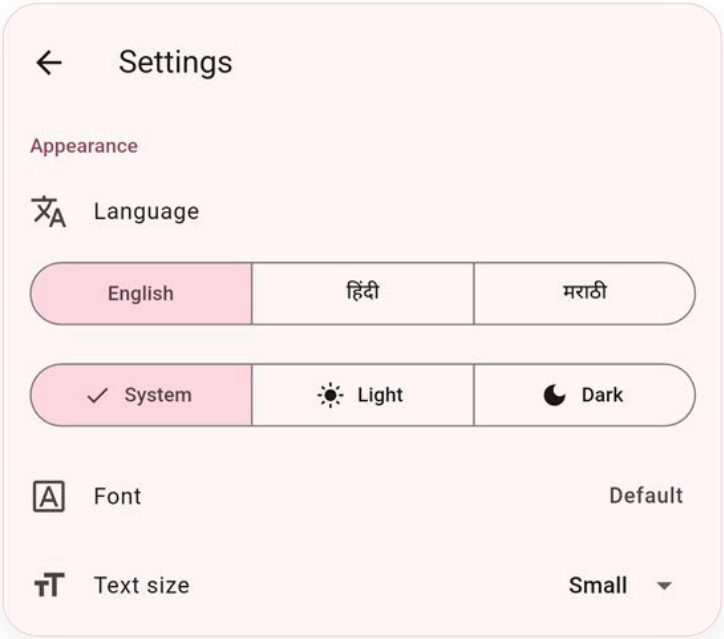

PART 3 · OPTIONAL

Settings

Tap the ⚙ gear at the top right.

1 **Language, theme, font and text size**

Choose **English, हिंदी or मराठी**, and Light or Dark mode. Changes apply straight away.

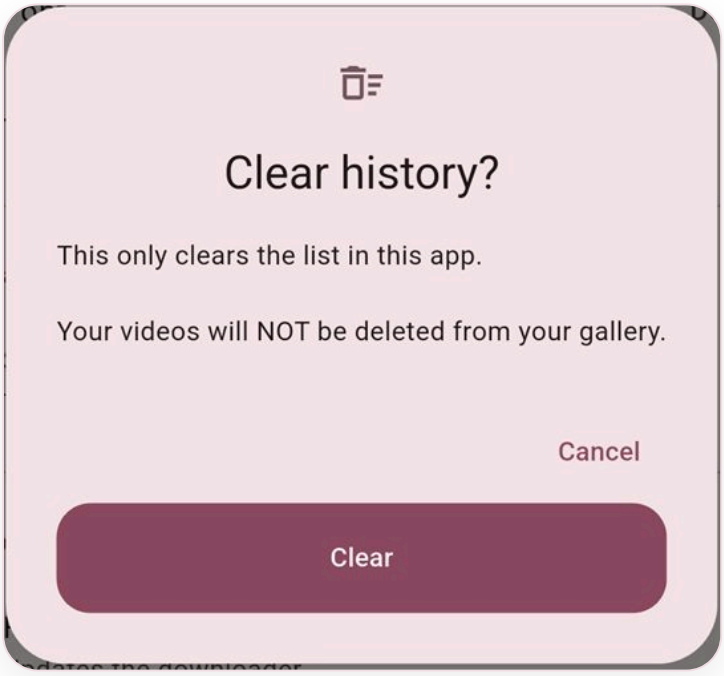

The same screen after choosing हिंदी.

2 Clear history

Empties the list inside the app. **Your videos stay in your gallery.**
